WorldAtlas.com privacy policy We respect your privacy and are committed to protecting your privacy on our site. The following information publishes the procedures for collecting and disseminating information for this site. This privacy policy was last updated on April 10, 2015. The legal property of WorldAtlas.com (the Website) is owned and operated by Reunion Technology Inc (us or us), a company registered under the laws of Canada that has its registered office at 7405 Transcanada Highway, Suite 100, Saint Laurent, Quebec H4T 1Z2. Personal data collected When you visit our website, we collect certain information regarding your device, such as your IP address, what pages you visit on our website, whether you have been referred to other websites and at what time you have visited our website. We do not collect any other type of personal data. If you access our website through a social media account, please read the social media provider's privacy policy for information regarding their data collection. Log files Like most standard Web sites, we use log files. This includes Internet Protocol (IP) addresses, browser type, Internet service provider (ISP), referring/exit pages, platform type, date/timestamp and number of clicks to analyze trends, manage the site, track user movement in summary, and collect broad demographic information for aggregate use. Cookies Cookie Is a cookie that is stored on a user's computer that is bound to user information. We only use cookies to track the progress of quizzes that are posted on our website. This is only a functional cookie and no personal data is collected. However, some of our business partners use cookies on our site (such as advertisers). However, we do not have access to or control over these cookies once we give them permission to set cookies for advertising. If you want to disable cookies, you can do so through individual browser options. Links This page contains links to other sites. Please note that we are not responsible for the privacy practices of this other site. We encourage our users to be aware when they leave our site and to read the privacy statement of any website that collects personally identifiable information. This privacy statement applies solely to information collected by this site. Advertisers We use third-party advertising companies to serve ads on our site. These ads may contain cookies and/or web beacons in order to collect usage and demographic data in the ad serving process and are collected by our advertising companies for this information Access. We work with advertising companies like Google AdSense. As a third-party vendor, Google uses cookies to serve ads on our site. Google's use of the DART cookie allows us to show ads to our users based on their visit to our site and other sites on the Internet. Users can opt out of using the DART cookie by visiting google's advertising and display network privacy policies. We Are Very concerned about our advertising partners to ensure that they comply with all applicable data protection laws and best data security practices. Purpose of data collection We use the information we collect for the purpose of: Managing our website, including troubleshooting, and statistical or data analysis; Improve our website and improve the user experience by ensuring that you have access to personalized content in accordance with your interests; Analyze user usage and optimize our services. To ensure that our website remains secure and is not subject to hacking or fraud. We do not sell or rent data shared with third parties to third parties. However, our partners, including advertising partners, may collect data relating to your website using the information below. See the advertisers section above for details. How your data is stored All data collected through our website is stored on servers located in the United States. Our servers are certified under the EU-US Privacy Shield. The IP address and user agent string data from all visitors are stored in rotating log files on Amazon servers for up to 7 days. All our employees, agents and partners are committed to maintaining the confidentiality of your data. We have reviewed our partners' privacy policies to ensure that they comply with similar policies to ensure the security of your data. Consent under applicable law If you are located in the European Economic Area (EEA), a consent window will be displayed when you access this website. If you have clicked yes, your consent will be stored on our servers for six (6) months and your data will be processed as set out in this Privacy Policy. After six months, you will be asked to give your consent again. You can withdraw your consent at any time. Withdrawing consent may hinder your ability to access certain services and will not allow us to provide personalized websites. Data security Our servers comply with ISO 27018, a code that focuses on privacy in the cloud. We take all reasonable precautions to ensure the security of your data. In the event that we become aware of any data breach, alter, unauthorized access or disclosure of any personal data, we will take all reasonable measures to protect your data and inform you as required by all applicable law. By accessing, changing and deleting your data, you have the right to request information relating to the data we have in our records for you, to request the rectification and/or deletion of your personal data. A thorough examination of the International Date Line conclusively proves that the modern weekly cycle does not go around the clock without interruption from creation. To suggest otherwise is to bow to tradition and assumptions - to the exclusion of evidence. An international data line is an imaginary line that runs through the center of the Pacific Ocean. It was officially established in 1884 at the International Meridian Conference in Washington, D.C. for the sole purpose of distinguishing between days on the Gregorian calendar. An international data line acts as a delimitation line separating two consecutive dates. When you cross the data line, you become a time traveler! Go west and it's a day later; go back and you've went back in time. 2 Date Line is largely governed by a 180° meridian across from greenwich meridian (Prime Meridian) in London, England.3 This line is far from straightward, as there are several contived deviations to suit the political and economic affiliation of the surrounding areas. The location selected for the international data line is arbitrary; its location is a matter of comfort and has no ties to anything in nature. 180 degrees was chosen [for the International Date Line] because it runs mostly across the open ocean in the central Pacific, zigzagging and zigging to surrounding nations on their own day and date. So the 180 degree option was arbitrary, but set the IDL in use today.4 The international data line can be anywhere . . . But it is best to be 180° from the defining meridian that passes through Greenwich, England. It is also fortunate that this area is covered mainly by an empty ocean. However, there have always been zigzags and zags in it to bring for local circumstances.5 180° meridian was selected as an international date line because it mostly runs through the sparsely populated central Pacific Ocean. It was decided at the International Meridian Conference in 1884 in Washington, D.C., where 26 countries participated. (obtained on May 20, 2017.) International Date Line (IDL) Summary: IDL is imaginary. The IDL was constructed by the Men's Committee in Washington, D.C. in 1884. The location of the IDL is arbitrary and has no connection to anything in nature. Because the IDL is arbitrary, it is movable. (It's been moved several times for political/economic convenience. We'll touch more on it later.) What is the Luni-Solar Date Line? The Luni-Solar Date Line is the demarcation line established on Earth by the sun and moon on the luni-solar conjunction.6 This phenomenon takes place at the beginning of each lunar cycle and is very predictable. Unlike the man-made date line, the Luni-Solar Date line is not arbitrary; rather, it is based on the movements of heavenly bodies, just as Yahuwah intended. And Elohim said: Let the lights in the sky of heaven divide day by night; and let them be signs and seasons, and days and years and years. (Genesis 1:14) Note that Genesis doesn't say... And Elohim said: Let the committee of people (about 6,000 years from now) create an imaginary line at their discretion to divide day after night; and let it be a sign, and for the period [of the time of worship] and the days and years. What makes the Luni-Solar Date Line so remarkable is that it allows us to distinguish between calendar days without human inventions (i.e. the International Date Line).8 When counting New Moon Day as the opening at dawn after the luni-solar connection, the whole world is united in observing not only the holidays and sabbaths, but every day. This means that everyone on earth starts their day in the same 24-hour period. As the Luni-Solar Date Line operates the first dawn after the luni-solar connection marks the beginning of the date of the line. Dawn then moves forward from this point bringing With it New Moon Day to the world. This is followed by six working days and then the seventh day of the Sabbath (Lunar Sabbath). Although Yahuwah's date line, which could also be called its dawn line, changes geographically from one lunace to the next, starting New Moon Day at dawn after a connection ensures that everyone on earth starts their day in the same 24 hour period. If the Father's holidays had never been forgotten and His calendar never left, there would be no reason to conjure up a man to suffocate the IDL. How does an international data line compare to the Luni-Solar Date Line? (1a) Is the international data line based on an observable phenomenon? No. IDL is 100% imaginary and arbitrary. (1b) Is Luni-Solar Date Line based on an observable phenomenon? Yes. It is based on the movements of the celestial bodies (in accordance with Gen. 1:14). (2a) Can an international data line be moved by man? Yes. Men moved the IDL several times for political/economic comfort. (2b) Can the Luni-Solar Date Line be moved by man? No. Because the Luni-Solar Date Line is determined by celestial bodies, it is beyond human reach. The Luni-Solar Date Line is under the direct supervision of Father Yahuwah, who wisdomfully founded the earth and understanding the heavens. (Proverbs 3:19) (3a) Who International data line? The IDL was invented by a committee of men in Washington, D.C. (3b) who created the Luni-Solar Date Line? Luni-Solar Date Line was founded by Yahuwah. At the beginning of each make-up, the movements of the heavenly bodies are determined (in accordance with Gen. 1:14). (4a) When was an international data line established? The Luni-Solar Date Line was founded in creation with the edification of the sun and moon. Which data line do you think Heaven supports? International Data Line Luni-Solar Date Line Imaginary &: Arbitrary Real; is objectively determined by an observable phenomenon in the sky. It can be moved by my men (the IDL has been moved several times for political/economic comfort.) It cannot be moved by humans (Because the Luni-Solar Date Line is determined by celestial bodies, it is beyond human reach. The Luni-Solar Date Line is under the direct supervision of Father Yahuwah.) Contrived by a committee of men gathered in Washington, D.C. Oredied by the Creator (the Luni-Solar Date Line is established at the beginning of each lunace movements of celestial bodies, in accordance with Gen. 1:14.) Founded in 1884 based on the creation of awakening ... Today, many are waking up to half-truths and directly proclaiming lies in an institutionalized church and returning to the contractual toss. They are enlightened by the eternal nature of the Yahuwah holidays and zealously support the return to life and observance of all that Yahuwah has commanded. Often overlooked, though, is that the calendar used to calculate holidays is irreparably pagan. Not only that, but it is relentlessly dependent on an international data line. This is a huge problem for those who profess to adhere to the Scriptures themselves. Zealously proclaiming the sola scriptura9 while making Yahuwah's holidays subordinate to the man-made International Date Line is completely inconsistent. SDAs &: the International Date Line: Cognitive Dissonance at its Best Adventist Church seventh-day was endowed with a wealth of biblical truth. One area is, in particular, their recognition of the immense importance of the sabbath day. Sadly, however, the SDA adamantly rejected the fullness of the three angelic messages and the growing light of the biblical period. As a result, he continues to blindly cling to the unbalanced theology of the elevation of papal Gregorian Saturday (as determined by man-made IDL), while professing scripture as the only rule of faith and duty. A closer look at SDA theology Adventists zealously claim that Saturday is the Biblical Sabbath (the seal of Yah) and that Sunday is a pagan day of worship (a sign of the beast), but they ignore the fact that it is the man-made date line itself that separates the two days. They realize the importance of keeping the Sabbath and the serious mistake of elevating the pagan sun's day, but they have no problem allowing a person to determine when the seventh day ends and begins the next day (across the international data line). That doesn't make sense. The only difference between Seal Yah and Mark of the Beast in SDA theology is the man-made date line. If you're an SDA, we humbly ask you to stop and think about it for a moment: If the ultimate conflict is to be as simple as Saturday versus Sunday, how is it possible that the only difference between the two days is the imaginary line contrived by the Men's Committee in Washington D.C.? And if Saturday is the ancient Sabbath of scripture, why is it governed solely by the invention of 1884? On the road the International Date Line has been relocated several times since its inception for convenience. Not only that, but also the unofficial 10 makeshift lines that preceded the IDL. Were moved on at least two occasions: the course of the provisional date line after alaska's modification in 1867, but the neglect of philippine adaptation in 1844/45, as published in the 4th edition (1885-1890) Meyers Konversationslexikons (lengths are counted from the Meridians ferro and Paris) Source: gent0113/dl/dl_philippines.htm Philippines: In 1844, the Philippines (along with the Mariana Islands, Guam, and Caroline Islands) removed Tuesday, December 31 from their calendar, shifting make-believe date lines eastward. As a result of what was previously recognized as Friday, it happened on Saturday, and what was previously recognized as Saturday became Sunday. SDAs in the Philippines ignore this conundrum altogether, albeit by worshipping on a new Saturday and bragging: Our Sabbath is the New Testament Sabbath. 11 By default, SDA theology requires that those who exalt what was earlier Saturday (new Sunday) are in danger of receiving the mark of the beast. This is illogical and inconsistent. How can an honest seeker of truth continue to cling to the flawed doctrine of a continuous weekly cycle in the face of such clear evidence to the contrary? Alaska: When the United States bought Alaska from Russia in 1867, the makeshift line was moved west. As a result, Alaska watched two Fridays in a row. At the inision of US Secretary of State William Seward, the United States Senate approved the purchase of Alaska from Russia for \$7,200,000 on April 9, 1867, and the Flag of the United States was raised on April 18, 1867. By coincidence, with the change of ownership, the de facto international data line has been moved westward, and Alaska has changed from Julian calendar to gregorian calendar Therefore for residents, Friday October 6, 1867 followed by Friday October 18, 1867; two Fridays in a row due to a shift in the date line.12 This means that what was previously recognized as Saturday happened on Friday, and what was previously recognized as Sunday happened on Saturday. Think about it; Saturday Sabbatarianism in Alaska today worship at what was on Sunday just 150 years ago. Again, the consequences for the Church of the SDA are huge, because their theology insists that those who persist on Sunday observance will eventually bear the mark of the beast. How can it be, if only 150 years ago, their day of worship (Saturday) was Sunday? Integrity requires Yahuwah's faithful to acknowledge the outrageous delusion that heavenly holy days are subordinate to a man-made date. Samoa Islands and Tokelau: In 1892, the IDL was moved west of the Samoan Islands. This was achieved by observing Monday, July 4, for two consecutive days on the islands; 119 years later, in 2011. Samoa moved the IDL back east by removing Friday, June 30, 2011. Tokelau, a nearby island belonging to New Zealand, made the crossing as well. Today, IDL passes between the islands of Samoa and American Samoa. Most SDAs in Samoa now worship on a new Sunday because, they say, a continuous weekly cycle is what matters. Yet they ignore the fact that the 2011 adjustment merely returned Samoa to the calendar week it had watched before 1892. This is absolutely nonsensical and once again clarifies the fallacy of the claim that the modern week circulated continuously and without interruption from creation. According to the theology of the SDA, the seal of Yah (observance of the seventh day of the Sabbath) and the mark of the beast (Sunday observance) in Samoa must be one and the same. This in itself should be enough to make any honest SDA rethink its paradigm. (Recommended reading: International date row change: Sabbath unchanged?) Kwajalein Atoll: In 1993, Kwajalein (one of the Marshall Islands) removed Saturday, August 21 from its calendar, causing the IDL to be moved east. This brought Kwajalein into harmony with the other islands, which were until then on another day, Eastern Kiribati: In 1995 Kiribati moved the IDL east for administrative convenience. 13 (Before that, the Republic of Kiribati was divided by a data line.) Modern Jews Admit Problem in Modern Judaism, there are four main views14 regarding where the data line should be: 90° east of Jerusalem 180° east of Jerusalem Mid-Pacific: Closely resembling an international data line There is no specific data line (observe when locals have) While no real seeker of truth should look at Askenasis Jews that there is even debate among self-called rabbis , indicating a bigger problem. Patriarchs and Prophets The way patriachs and prophets Time? Do we believe that the antepocalypse men of Yah and the post-flood patriarchs/prophets are using zigzag imaginary date lines in the midst of what is now the Pacific Ocean to determine when the Sabbaths and holidays came? That's really absurd. Again, the modern data line was created in 1884 by mere men for the purpose of secular commerce. Noah's descendants Think about it for a moment: When Noah's family began to grow and replenish the earth after the flood, some would travel east, and some would travel west. In the end, the two groups would meet on the other side of the world.15 Now think of the following: If Noah's descendants had followed a continuous weekly cycle, they would have been one calendar day apart when they met on the other side (for example, one group would observe the sixth day while the other group observed the seventh day). This is because those who traveled east traveled to the rising sun (they would return to the setting sun to the self-contentment and darkness from where you were called? We pray that you will shake off the spirit of Laodicea and flee Babylon while there is still time. Please don't make the mistake of believing there's security in the numbers. Your pastor might decide to stay in the dark. Your church family might prefer the comfort of a bench to the discomfort of carrying a cross. Anyone you know could reject the second rain and the rising light of the Father's calendar. However, this does not excuse you from your responsibility to accept the truth. Yahuwah made it clear to you. Incomprehensible blessings await those who trust and obey. But the path of the righteous is like a shining light that shines more and more until the perfect day. (Proverbs 4:18) Related: 1 The International Date Line was not officially established until 1890, but the need for such a line on Earth to adjust the day was inadvertently discovered by the Magellan crew, which, from 1519 to 1521, was the first to circumnavigate the world. (Peterson, James F., Sack, Dorothy., Gabler, Robert E., Physical geography, 11, ed. Cengage Learning, 4. Education. 672 pages p. 34. obtained May 11, 2017.) 3 The Greenwich Meridian was founded in 1851 by Sir George Biddell Airy, an English and astronomer. It is the Greenwich Meridian that is now introducing Coordinated Universal Time (UTC). Choosing Greenwich as an anchor point for time measurement was arbitrary. It was based more on national pride and comfort. (obtained april 29, 2017.) 6 The sun, because of its slightly faster movement, stretches in front of the moon by about 12.2 ° every day. As a result, it gets so far ahead of the moon that it circles around it and overtakes it again after about 29.5 days (12.2 ° x 29.5 = 360 ° = full circle). The luni-solar conjunction is the exact moment at which the sun is again aligned with the moon (the same celestial length) before moving again before the moon at the beginning of the next lunar cycle. The connection time is often referred to as the astronomical new moon. 7 The word translated as seasons in Genesis 1:14 is mo'ed. Mo'e is used in a broad sense for all religious congregations. It was closely related to the abode itself. [Yahuwah] met israel there at certain times in order to reveal His will. It is a common term for worship of the congregation. . . [Yahuwah] people. (Lexical aids to the Old Testament, Hebrew-Greek keyword study bible, p. 1626.) 8 Although we use modern technologies to accurately determine when a connection occurs, we do not use a human-made date line; rather, we use the heavenly bodies ourselves to count time, just as we are instructed in Genesis 1:14. The ancients were much smarter and in harmony with heaven than we are today. This is evidenced by the myriad ancient structures around the world that can accurately predict eclipses, equinoxes, solstices, etc. as a result, they were able to accurately predict the celestial phenomenon without the use of modern equipment. 9 Sola Scriptura was the rallying cry of the Protestant Reformation. It's a Latin phrase, which means Scripture itself. 10 The need for a date was promoted by 13th-century geographers. Various popes and empires subsequently declared rows of dates in accordance with their needs. (The Jerusalem Post [highlighting supplied], obtained on May 18, 2017.) 11 obtained august 8, 2017.
